

Energy performance certificate (EPC)

115, Avonbrook Gardens COLERAINE BT52 1NS	Energy rating E	Valid until: 12 August 2030
		Certificate number: 9110-0628-7670-8067-4296

Property type	Detached bungalow
Total floor area	103 square metres

Energy rating and score

This property’s energy rating is E. It has the potential to be D.

[See how to improve this property’s energy efficiency.](#)

The graph shows this property’s current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property’s energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property’s age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 100 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Poor

Feature	Description	Rating
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system, no cylinder thermostat	Very poor
Lighting	Low energy lighting in 20% of fixed outlets	Poor
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, dual fuel (mineral and wood)	N/A

Primary energy use

The primary energy use for this property per year is 288 kilowatt hours per square metre (kWh/m²).

► [About primary energy use](#)

How this affects your energy bills

An average household would need to spend **£1,307 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £464 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2020** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Impact on the environment

This property's environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO ₂
This property produces	7.6 tonnes of CO ₂
This property's potential production	4.9 tonnes of CO ₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm

Typical installation cost £100 - £350

Typical yearly saving £75

Potential rating after completing step 1

46 E

Step 2: Low energy lighting

Typical installation cost £40

Typical yearly saving £52

Potential rating after completing steps 1 and 2

48 E

Step 3: Hot water cylinder thermostat

Typical installation cost £200 - £400

Typical yearly saving £25

Potential rating after completing steps 1 to 3

49 E

Step 4: Heating controls (room thermostat)

Typical installation cost £350 - £450

Typical yearly saving £80

Potential rating after completing steps 1 to 4

53 E

Step 5: Heat recovery system for mixer showers

Typical installation cost £585 - £725

Typical yearly saving £25

Potential rating after completing steps 1 to 5

54 E

Step 6: Replace boiler with new condensing boiler

Typical installation cost £2,200 - £3,000

Typical yearly saving £208

Potential rating after completing steps 1 to 6

64 D

Step 7: Floor insulation (solid floor)

Typical installation cost £4,000 - £6,000

Typical yearly saving £95

Potential rating after completing steps 1 to 7

68 D

Step 8: Solar water heating

Typical installation cost £4,000 - £6,000

Typical yearly saving £38

Potential rating after completing steps 1 to 8

70 C

Step 9: Solar photovoltaic panels, 2.5 kWp

Typical installation cost £3,500 - £5,500

Typical yearly saving**£309****Potential rating after completing
steps 1 to 9****79 C**

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name

Steven Doherty

Telephone

07810 870229

Emailecoepcs@gmail.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Elmhurst Energy Systems Ltd

Assessor's ID

EES/019317

Telephone

01455 883 250

Emailenquiries@elmhurstenergy.co.uk

About this assessment

Assessor's declaration

No related party

Date of assessment

13 August 2020

Date of certificate
