

# Energy performance certificate (EPC)

|                                                              |                           |                                              |
|--------------------------------------------------------------|---------------------------|----------------------------------------------|
| Apartment 4<br>16 Lansdowne Crescent<br>PORTRUSH<br>BT56 8AY | Energy rating<br><b>E</b> | Valid until: 27 June 2032                    |
|                                                              |                           | Certificate number: 0300-2906-2050-2022-3405 |

|                  |                   |
|------------------|-------------------|
| Property type    | Top-floor flat    |
| Total floor area | 116 square metres |

## Energy rating and score

This property’s energy rating is E. It has the potential to be D.

[See how to improve this property’s energy efficiency.](#)

The graph shows this property’s current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

# Breakdown of property’s energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property’s age and type. They are used for features the assessor could not inspect.

| Feature | Description                                         | Rating    |
|---------|-----------------------------------------------------|-----------|
| Wall    | Solid brick, as built, partial insulation (assumed) | Average   |
| Wall    | Cavity wall, as built, insulated (assumed)          | Good      |
| Roof    | Pitched, 300 mm loft insulation                     | Very good |
| Roof    | Pitched, 100 mm loft insulation                     | Average   |

| Feature              | Description                 | Rating    |
|----------------------|-----------------------------|-----------|
| Window               | Fully double glazed         | Good      |
| Main heating         | Boiler and radiators, LPG   | Poor      |
| Main heating control | Programmer, TRVs and bypass | Average   |
| Hot water            | From main system            | Very poor |
| Lighting             | No low energy lighting      | Very poor |
| Floor                | (another dwelling below)    | N/A       |
| Secondary heating    | None                        | N/A       |

## Primary energy use

The primary energy use for this property per year is 172 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [About primary energy use](#)

## Additional information

Additional information about this property:

- Stone walls present, not insulated

## How this affects your energy bills

An average household would need to spend **£1,312 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £381 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Impact on the environment

This property's environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

## Carbon emissions

**An average household produces**

**6 tonnes of CO<sub>2</sub>**

---

|                               |                          |
|-------------------------------|--------------------------|
| <b>This property produces</b> | <b>4.2 tonnes of CO2</b> |
|-------------------------------|--------------------------|

---

|                                             |                          |
|---------------------------------------------|--------------------------|
| <b>This property's potential production</b> | <b>3.0 tonnes of CO2</b> |
|---------------------------------------------|--------------------------|

---

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

## Step 1: Increase loft insulation to 270 mm

|                           |             |
|---------------------------|-------------|
| Typical installation cost | £100 - £350 |
|---------------------------|-------------|

|                       |     |
|-----------------------|-----|
| Typical yearly saving | £85 |
|-----------------------|-----|

|                                          |      |
|------------------------------------------|------|
| Potential rating after completing step 1 | 55 D |
|------------------------------------------|------|

## Step 2: Low energy lighting

|                           |     |
|---------------------------|-----|
| Typical installation cost | £85 |
|---------------------------|-----|

|                       |     |
|-----------------------|-----|
| Typical yearly saving | £75 |
|-----------------------|-----|

|                                                 |      |
|-------------------------------------------------|------|
| Potential rating after completing steps 1 and 2 | 56 D |
|-------------------------------------------------|------|

## Step 3: Heating controls (room thermostat)

|                           |             |
|---------------------------|-------------|
| Typical installation cost | £350 - £450 |
|---------------------------|-------------|

|                       |     |
|-----------------------|-----|
| Typical yearly saving | £56 |
|-----------------------|-----|

|                                                |      |
|------------------------------------------------|------|
| Potential rating after completing steps 1 to 3 | 58 D |
|------------------------------------------------|------|

## Step 4: Replace boiler with new condensing boiler

|                           |                 |
|---------------------------|-----------------|
| Typical installation cost | £2,200 - £3,000 |
|---------------------------|-----------------|

|                       |      |
|-----------------------|------|
| Typical yearly saving | £165 |
|-----------------------|------|

|                                                |      |
|------------------------------------------------|------|
| Potential rating after completing steps 1 to 4 | 65 D |
|------------------------------------------------|------|

## Step 5: Internal wall insulation

|                           |                  |
|---------------------------|------------------|
| Typical installation cost | £4,000 - £14,000 |
|---------------------------|------------------|

|                       |     |
|-----------------------|-----|
| Typical yearly saving | £43 |
|-----------------------|-----|

|                                                |
|------------------------------------------------|
| Potential rating after completing steps 1 to 5 |
|------------------------------------------------|

67 D

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

|                 |                |
|-----------------|----------------|
| Assessor's name | Stephen Wright |
|-----------------|----------------|

|           |             |
|-----------|-------------|
| Telephone | 07927348441 |
|-----------|-------------|

|       |                                                            |
|-------|------------------------------------------------------------|
| Email | <a href="mailto:sjw1969@live.co.uk">sjw1969@live.co.uk</a> |
|-------|------------------------------------------------------------|

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

|                      |                             |
|----------------------|-----------------------------|
| Accreditation scheme | Elmhurst Energy Systems Ltd |
|----------------------|-----------------------------|

|               |            |
|---------------|------------|
| Assessor's ID | EES/005997 |
|---------------|------------|

|           |               |
|-----------|---------------|
| Telephone | 01455 883 250 |
|-----------|---------------|

|       |                                                                                    |
|-------|------------------------------------------------------------------------------------|
| Email | <a href="mailto:enquiries@elmhurstenergy.co.uk">enquiries@elmhurstenergy.co.uk</a> |
|-------|------------------------------------------------------------------------------------|

### About this assessment

|                        |                  |
|------------------------|------------------|
| Assessor's declaration | No related party |
|------------------------|------------------|

|                    |             |
|--------------------|-------------|
| Date of assessment | 26 May 2022 |
|--------------------|-------------|

**Date of certificate**

28 June 2022

**Type of assessment**▶ [RdSAP](#)

## Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at [mhclg.digital-services@communities.gov.uk](mailto:mhclg.digital-services@communities.gov.uk) or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

There are no related certificates for this property.
