

# **Energy rating and score**

This property's energy rating is E. It has the potential to be D.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                    | Rating  |
|----------------------|--|---------|
| Wall                 | Cavity wall, as built, no insulation (assumed) | Poor    |
| Wall                 | Cavity wall, as built, insulated (assumed)     | Good    |
| Roof                 | Pitched, insulated (assumed)                   | Average |
| Window               | Fully double glazed                            | Average |
| Main heating         | Boiler and radiators, oil                      | Average |
| Main heating control | Programmer and room thermostat                 | Average |
| Hot water            | From main system, no cylinder thermostat       | Poor    |
| Lighting             | Below average lighting efficiency              | Poor    |
| Floor                | Suspended, no insulation (assumed)             | N/A     |
| Floor                | Suspended, limited insulation (assumed)        | N/A     |
| Air tightness        | (not tested)                                   | N/A     |
| Secondary heating    | Room heaters, electric                         | N/A     |

#### Primary energy use

The primary energy use for this property per year is 296 kilowatt hours per square metre (kWh/m2).

#### **Additional information**

Additional information about this property:

- · Cavity fill is recommended
- Dwelling may be exposed to wind-driven rain

#### **Smart meters**

This property had **no smart meters** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

Find out how to get a smart meter (https://www.smartenergygb.org/)

# How this affects your energy bills

An average household would need to spend £2,428 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £806 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### **Heating this property**

Estimated energy needed in this property is:

- 16,806 kWh per year for heating
- 3,997 kWh per year for hot water

# Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

# This property produces 7.2 tonnes of CO2 This property's potential 4.6 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

#### **Carbon emissions**

An average household produces

6 tonnes of CO2

# Steps you could take to save energy

| Step   | Typical installation cost | Typical yearly saving |
|--|---------------------------|-----------------------|
| 1. Cavity wall insulation                            | £900 - £1,500             | £428                  |
| 2. Floor insulation (suspended floor)                | £5,000 - £10,000          | £177                  |
| 3. Add additional 80 mm jacket to hot water cylinder | £20 - £40                 | £16                   |
| 4. Hot water cylinder thermostat                     | £130 - £180               | £107                  |
| 5. Heating controls (TRVs)                           | £220 - £250               | £78                   |
| 6. Solar photovoltaic panels                         | £8,000 - £10,000          | £236                  |

## Who to contact about this certificate

## Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Ronnie Watson     |
|-----------------|-------------------|
| Telephone       | 07925226876       |
| Email           | ronnie@eassni.com |

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme   | ECMK             |  |
|------------------------|------------------|--|
| Assessor's ID          | ECMK302219       |  |
| Telephone              | 0333 123 1418    |  |
| Email                  | info@ecmk.co.uk  |  |
